

New opportunity for Postdoctoral Researchers in the Department of Hydraulics and Sanitation (EESC/USP)

The enrolment will be open between July 1 to 30, 2019 for the selection of a postdoctoral researcher, who will work in the research project “*Low cost technologies for safe drinking water in developing regions (SAFEWATER)*” funded by *Global Challenges Research Fund (GCRF) UK Research and Innovation* (Grant Ref: EP/P032427/1).

By Brazil, the project is under the responsibility of Prof. Lyda Patricia Sabogal Paz of the Department of Hydraulics and Sanitation (EESC/USP).

The scholarship will be R\$ 5750 (BRL) per month. Scholarship will be annual and it may be renewed, according to the student performance. The probationary period will last three (3) months.

Basic project information:

“Low cost technologies for safe drinking water in developing regions (SAFEWATER)” is an interdisciplinary research project led by Ulster University (Northern Ireland) in collaboration with University of Medellin and CTA (Colombia), University of Sao Paulo (Brazil) and *Fundación Cantaro Azul* (Mexico). It is a four-year project, which aims to grow research capacity and capability in the UK and overseas, with a focus on delivery of safe drinking to disadvantaged communities in developing regions. This project is funded by the Global Challenges Research Fund (GCRF) UK Research and Innovation (Grant Ref: EP/P032427/1).

Postdoctoral researchers profile:

- ✓ Candidate with degree in biology, environmental engineering, chemistry or related.
- ✓ PhD ended, involving parasitology and treatment of drinking water or wastewater.
- ✓ Experience with parasitology, slow sand filtration and disinfection.
- ✓ Experience in statistics and AutoCad
- ✓ Advanced English and ability to attend meetings, to do presentations and write reports and papers in English
- ✓ Availability to live in São Carlos/SP (Brazil).
- ✓ Availability to travel in order to meet the needs of the project (meetings and Workshops to be held in Colombia, Brazil, Mexico and Northern Ireland).
- ✓ Candidate with a valid passport during the entire research project.
- ✓ To have defended the thesis with less than six (6) years, according to USP rules (Resolution CoPq 7406 of 10/3/2017).
- ✓ Ability to work in groups
- ✓ Number of vacancies: 1

Stages of the selection process:

- ✓ Candidates interested have to send the **currículo lattes updated** and a **recommendation letter updated from the supervisor of the doctoral or postdoctoral research** by e-mail to Prof. Lyda Patricia Sabogal Paz (lysaboga@sc.usp.br).
- ✓ Selected candidates will be interviewed in August 2019 (date to be combined)
- ✓ Selected candidates will be notified in August 2019.
- ✓ Beginning of postdoctoral research: as from September 2019.

Project financed by:

Global Challenges Research Fund (GCRF) UK Research and Innovation (Grant Ref: EP/P032427/1)
